## REQUEST FOR TRIPLE SUPERPHOSPHATE 1937 Agricultural Conservation Program

(Name)

(Tenure)

(Address)

I, the undersigned producer on the farm described in the above-numbered work sheet, hereby request the number of pounds of triple superphosphate (approximately 43 percent available  $P_2O_5$ ) indicated below for use in accordance with and subject to the provisions of subsection (g) of section 4 of ECR-B-101 \_\_\_\_\_, in carrying out on said farm in the manner

(State)

indicated by the information set forth below the practice described in said subsection (g). It is understood that I am to pay the cost of transportation from Sheffield, Ala., and the handling charges of any triple superphosphate obtained on the basis of this request and that such triple superphosphate shall remain the property of the United States until and unless used in accordance with said provisions of ECR-B-101. I CERTIFY that this request is being made with the knowledge and consent of all persons eligible to receive any payment with respect to this farm under the 1937 Agricultural Conservation Program and that all representations and information contained herein are correct.

Subsection (g) of section 4 of part I of ECR-B-101 for the respective States of North Carolina, Virginia, Tennessee, and Kentucky reads substantially as follows:

Improving land by the use of Superphosphate—Applying not less than 100 pounds per acre of (1) 16 percent superphosphate in North Carolina, Virginia, or Tennessee, or (2) 20 percent superphosphate in Kentucky (or its equivalent), on any permanent pasture, or in connection with seeding or maintaining any legume or perennial grass listed in subsection (a) of the said section 4, or in connection with any green manure crop plowed or disked under as provided in subsection (b) of the said section 4. Payment will be made on a quantity not exceeding 500 pounds per acre, as follows:

(1) *In North Carolina, Virginia, and Tennessee* (16 percent superphosphate) 60 cents per 100 pounds; or, if the superphosphate is applied in connection with a legume or perennial grass listed in subsection (a) of the said section 4, seeded in connection with a soil-depleting crop, 30 cents per 100 pounds.

(2) *In Kentucky* (20 percent superphosphate) 75 cents per 100 pounds; or, if the superphosphate is applied in connection with a legume or perennial grass listed in subsection (a) of the said section 4, seeded in connection with a soil-depleting crop, 37½ cents per 100 pounds.

In connection with this practice, the Agricultural Adjustment Administration will make available at Sheffield, Ala., a supply of triple superphosphate (approximately 43 percent superphosphate) which, within the limit of such supply, may, upon requests filed at the county office, be obtained for application on the farm in accordance with the foregoing provisions of this subsection (g). If triple superphosphate is so obtained, 60 cents for each 16 pounds (North Carolina, Virginia, and Tennessee) or 75 cents for each 20 pounds (Kentucky) of phosphoric acid contained therein shall, in accordance with instructions to be issued by the Agricultural Adjustment Administration, be deducted from any payment (including payment for carrying out this practice) which otherwise would be made to any person(s) eligible to receive payments with respect to the farm; *provided*, however, that such deduction will first be made from payments with respect to the farm which otherwise would be made to the person(s) carrying out this practice.

The legumes or perennial grasses referred to as being listed in subsection (a) of section 4 are as follows: Alfalfa, red clover, mammoth clover, sericea, kudzu, bluegrass, Austrian winter peas, vetch, crimson clover, alsike clover, sweetclover, annual lespedeza, orchard grass, reed canary grass, white clover, bur clover, crotalaria, redtop, timothy, Dallis grass, carpet grass, or any mixture of these legumes or grasses.

The green manure crops referred to which may be plowed or disked under as provided in subsection (b) of section 4 are as follows: Soybeans, velvet beans, cowpeas, small grains or mixtures of small grains, Italian ryegrass, Sudan, millet, sorghum, rape, or sowed corn.

LEGUME, GRASS, GREEN MANURE, OR PERMANENT PASTURE TO BE TREATED	ACRES TO BE TREATED	RATE OF APPLICATION PER ACRE

REQUEST FOR TRIPLE SUPERPHOSPHATE  
1937 Agricultural Conservation Program

(Name)

(Tenure)

(Address)

I, the undersigned producer on the farm described in the above numbered work sheet, hereby request the number of pounds of triple superphosphate (approximately 43 percent available  $P_2O_5$ ) indicated below for use in accordance with and subject to the provisions of subsection (g) of section 4 of ECR-B-101 \_\_\_\_\_, (State)

in carrying out on said farm in the manner indicated by the information set forth below the practice described in said subsection (g). It is understood that I am to pay the cost of transportation from Sheffield, Alabama, and the handling charges of any triple superphosphate obtained on the basis of this request and that such triple superphosphate shall remain the property of the United States until and unless used in accordance with said provisions of ECR-B-101. I certify that this request is being made with the knowledge and consent of all persons eligible to receive any payment with respect to this farm under the 1937 Agricultural Conservation Program and that all representations and information contained herein are correct.

Subsection (g) of section 4 of Part I of ECR-B-101 for the respective States of North Carolina, Virginia, Tennessee, and Kentucky reads substantially as follows:

Improving land by the use of Superphosphate - Applying not less than 100 pounds per acre of (1) 16 percent superphosphate in North Carolina, Virginia, or Tennessee, or (2) 20 percent superphosphate in Kentucky, (or its equivalent) on any permanent pasture, or in connection with seeding or maintaining any legume or perennial grass listed in subsection (a) of the said section 4, or in connection with any green manure crop plowed or disced under as provided in subsection (b) of said section 4. Payment will be made on a quantity not exceeding 500 pounds per acre, as follows:

(1) In North Carolina, Virginia, and Tennessee (16 percent superphosphate) 60 cents per 100 pounds; or, if the superphosphate is applied in connection with a legume or perennial grass listed in subsection (a) of the said section 4 seeded in connection with a soil-depleting crop, 30 cents per 100 pounds.

(2) In Kentucky (20 percent superphosphate) 75 cents per 100 pounds; or, if the superphosphate is applied in connection with a legume or perennial grass, listed in subsection (a) of the said section 4, seeded in connection with a soil-depleting crop, 37½ cents per 100 pounds.

In connection with this practice, the Agricultural Adjustment Administration will make available at Sheffield, Alabama, a supply of triple superphosphate (approximately 43 percent superphosphate) which, within the limit of such supply, may, upon requests filed at the county office, be obtained for application on the farm in accordance with the foregoing provisions of this subsection (g). If triple superphosphate is so obtained, 60 cents for each 16 pounds (North Carolina, Virginia and Tennessee) or 75 cents for each 20 pounds (Kentucky) of phosphoric acid contained therein shall, in accordance with instructions to be issued by the Agricultural Adjustment Administration, be deducted from any payment (including payment for carrying out this practice) which otherwise would be made to any person(s) eligible to receive payments with respect to the farm; provided, however, that such deduction will first be made from payments with respect to the farm which otherwise would be made to the person(s) carrying out this practice.

The legumes or perennial grasses referred to as being listed in subsection (a) of section 4 are as follows: alfalfa, red clover, mammoth clover, sericea, kudzu, bluegrass, Austrian winter peas, vetch, crimson clover, alsike clover, sweet clover, annual lespedeza, orchard grass, reed canary grass, white clover, bur clover, orotalaria, redtop, timothy, Dallis grass, carpet grass, or any mixture of these legumes or grasses.

The green manure crops referred to which may be plowed or disced under as provided in subsection (b) of section 4 are as follows: soybeans, velvet beans, cowpeas, small grains or mixtures of small grains, Italian ryegrass, Sudan, millet, sorghum, rape, or sowed corn.

## STATEMENT OF 1937 BASES AND ALLOWANCE

(Name of operator or owner)

(Address)

This statement shows the soil-depleting bases for your farm and the acreage of crops which can be grown if the largest payment under the 1937 Agricultural Conservation Program is to be obtained. The figures indicated herein are based upon existing provisions of the 1937 program and are subject to change or correction if necessary. The statement is for your information and places no obligation upon any person.

### SOIL-DEPLETING ACREAGE

SOIL-DEPLETING CROPS	BASE	ACREAGE MAXIMUM DIVERSION	DIVERSION PAYMENT PER ACRE	ACREAGE WHICH CAN BE GROWN WITH LARGEST DIVERSION PAYMENT
General.....				
Peanuts.....				
Tobacco.....				
Cotton.....				

If the acreage of any depleting crop(s) exceeds the base, a deduction will be made for each acre above the base at the rate which would be paid for diversion.

### SOIL-CONSERVING ACREAGE

The minimum acreage of soil-conserving crops required in 1937, if the largest payment is to be obtained, is \_\_\_\_\_ acres.

For each acre less than this minimum there will be a deduction of \$3 per acre. Diversion payment will not be made on an acreage greater than the 1937 acreage of soil-conserving crops on the farm.

### SOIL-BUILDING ALLOWANCE

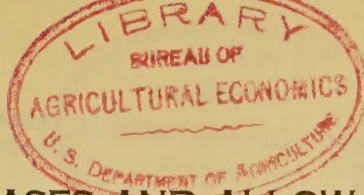

\$\_\_\_\_\_ can be earned by carrying out soil-building practices, if depleting crops do not exceed the acreage which can be grown with largest diversion payment. This soil-building allowance will be reduced \$1 for each acre by which depleting crops exceed the acreage which can be grown with maximum diversion payment, but will not be reduced below \$\_\_\_\_\_

We suggest that you refer to ECR Leaflet 101, entitled Better Balanced Farming, for details about soil-building practices and other provisions of the 1937 program.

COUNTY AGRICULTURAL CONSERVATION ASSOCIATION,

By \_\_\_\_\_, \_\_\_\_\_

(Title)

County Code and Serial Number

1937 BASES AND GENERAL FARM ALLOWANCE

Name of Operator or Owner

Address

This statement shows the soil-depleting bases for your farm and the acreage of crops which can be grown if the largest payment under the 1937 Agricultural Conservation Program for White County, Tennessee, is to be obtained. The figures indicated herein are based upon existing provisions of the 1937 program and are subject to change or correction if necessary. The statement is for your information and places no obligation upon any person.

Tobacco and Cotton

Crops	Base	Acreage maximum diversion	Diversion payment per acre	Acreage which can be grown with largest diversion payment
Tobacco				
Cotton				

If the 1937 acreage of tobacco or cotton exceeds the base therefor, a deduction will be made for each acre above the base at the rate indicated for diversion payment per acre.

Soil-Conserving Acreage

The minimum acreage of soil-conserving crops required in 1937, if the largest payment is to be obtained, is \_\_\_\_\_ acres, if maximum diversion is made from tobacco, cotton and general soil-depleting bases; it is \_\_\_\_\_ acres, if no diversion is made from the general soil-depleting base and maximum diversion is made from tobacco and cotton soil-depleting bases.

For each acre of soil-conserving crops less than this minimum there will be a deduction of \$3.00 per acre from any payment with respect to the farm.

Diversion payment will not be made on an acreage greater than the 1937 acreage of soil-conserving crops on the farm.

General Farm Allowance

\$\_\_\_\_\_ can be earned in either of two ways:

By carrying out soil-building practices alone, or

By a combination of carrying out soil-building practices and diversion from the general soil-depleting base.

In case you desire to earn a part of the General Farm Allowance by diversion from the general soil-depleting base, the maximum amount which can be earned by such diversion is \$\_\_\_\_\_; the remainder of the allowance, \$\_\_\_\_\_, can be earned by carrying out soil-building practices.

General Soil-Depleting Crops

You may obtain payment for diversion from the general soil-depleting base on not to exceed \_\_\_\_\_ acres at the rate of \$\_\_\_\_\_ per acre. The acreage which can be grown in 1937 and obtain the maximum diversion payment is \_\_\_\_\_ acres.

If you do not elect to divert from the general base, the 1937 acreage should not exceed the base, \_\_\_\_\_ acres, unless the crops are for home consumption on the farm.

We suggest that you refer to ECR-Leaflet No. 101-White County entitled "Better Balanced Farming" for details about soil-building practices and other provisions of the 1937 program.
